Trello
Bitbucket

PEAK *an original web application*
front end dev / since apr.2017

PEAK is a web-based app aimed to bridge the technical gap for Adapted PE teachers who work with mentally and physically disabled children in Wake County. Being faced with the need to easily track and integrate unusual individualized education plans, PEAK provides these educators with the ability to do so by handling the complex data for them with a user friendly UI.

| UI/UX design and implementation
| Advisor for database structure

for ipad use

React • JSX • Bootstrap • CSS3 • MongoDB
