QA Engineer

Qualities

Highly organized	Self-disciplined	Artistic
Adaptive	Aggressive problem-solver	Empathetic
Responsible	Quick-learner	Goal-driven
Detail-Oriented	Analytical	Friendly

Experience

MarginFactor

QA, Software Development   feb 2018 - aug 2018

Selenium C# .Net Bootstrap Angular 6 HTML5/CSS3 | Bitbucket   Jira

- Built automated tests, including: e2e client-side tests for an AngularJS app; API integration. The tests are currently used for regression testing, real-time monitoring and alerting. My initial QA efforts uncovered 60 bugs immediately and continued to catch bugs before they could impact production.
- Built a configurable automation tool which integrated with an online securities trading system. The tool operates in real-time, pulling and parsing CSV reports then sending data via JSON to our API, saving users hours of effort.

Heal House Call Veterinarian

QA, Team Management   aug 2017 - jan 2018

JSON APIs | Trello

- Manual testing, including clear communication and documentation of bugs. My efforts have drastically reduced customer complaints 90+%.
- Assisted COO in approving code review of legacy code, revealing multiple flaws, ultimately leading to the decision to rebuild, saving in future costs and time.

Internship   aug 2017 - jan 2018

Objective-C | XCode Bitbucket

- Discovered over 1k memory leaks, 400+ deprecations and guided remote team to resolve them, resulting in an exceptionally better product and happier customers.

Education

The Coding Bootcamp at UNC Chapel Hill
Certificate in Full-Stack Development
2016 - 2017
